

OMI Authority Rename Lock

Tetragrammatron Relation Governor

Witnesses:

```
0x1E
0x3C
0x78
```

Role:

```
Polybius diagonal closure
centered fold
shifted/full-system fold
relation validation
```

Canonical sentence:

```
The Tetragrammatron Relation Governor validates relation closure and fold-carry.
```

Metatron Incidence Scribe

Witnesses:

```
0x18

FS = 0x0001
GS = 0x0010
RS = 0x0100
US = 0x1000

CARRY = 0x10000
```

Role:

```
gauge incidence
open/sealed polarity
```

pairwise gauge incidence
hexadecimal-place stepping
gauge carry
incidence inscription

Canonical sentence:

Metatron scribes the FS/GS/RS/US gauge incidence and its hexadecimal carry.

Gnomonic Projection Azimuth

Witnesses:

0xAA55
0x55AA

Role:

alternating balanced witness
complementary contrast
observer-relative orientation
azimuth
tangent-plane projection
scribe-facing projection

Canonical sentence:

The Gnomonic Projection Azimuth orients accepted state for observer-relative projection.

Omicron

Omicron owns:

the canonical low gauge table
0x00..0x7F

the four 32-position character sectors

the hidden-to-readable tangent

the F-column branch

the character and place-value coupling

Canonical sentence:

Omicron is the bounded low gauge.

Omicron

Omicron owns:

0x00..0x1F
LOW CONTROL PLANE
32 positions

0x20..0x7F
LOW AFFINE SPACE
96 positions

0x80..0x9F
HIGH PROJECTIVE CONTROL PLANE
32 positions

0xA0..0xFF
HIGH PROJECTIVE SPACE
96 positions

Canonical sentence:

Omicron resolves the bounded Omicron gauge against the complete low/high byte field.

Final Authority Chain

Omicron
coordinates the four circular runtime planes

Omicron
defines the bounded sign and place gauge

OMI-Lisp
declares lazy relations

OMI
cites addressed relations

Tetragrammatron Relation Governor
validates diagonal closure and relation fold

Metatron Incidence Scribe
records gauge incidence, polarity, stepping, and carry

Receipt
records acceptance or rejection

Gnomonic Projection Azimuth
orients accepted state for projection

IMO
carries the resulting bytes, files, events, and surfaces

Migration Map

Replace the old names everywhere as follows:

OLD:
Tetragrammatron Incidence Controller

NEW:
Metatron Incidence Scribe

OLD:
Metatron

Metatron Witness
Metatron Projection
Metatron Balanced Witness

NEW:
Gnomonic Projection Azimuth

Keep unchanged:

Tetragrammatron Relation Governor
Omicron
Omicron
OMI
IMO
Receipt

Witness Ownership Lock

Tetragrammatron Relation Governor:
0x1E
0x3C
0x78

Metatron Incidence Scribe:
0x18
0x0001
0x0010
0x0100
0x1000
0x10000

Gnomonic Projection Azimuth:
0xAA55
0x55AA

Omicron:
0x00..0x7F bounded low gauge

Omicron:
four-plane 0x00..0xFF circular resolver

Final Canon

Omicron resolves.

Omicron gauges.

OMI-Lisp declares.

OMI cites.

Tetragrammatron validates relation.

Metatron scribes incidence.

Receipt records.

Gnomonic Projection Azimuth orients projection.

IMO carries.
